Pumping & Pollution Control Solutions

Interchangeable Brush, Disc & Drum Oil Skimmer

The Tri Skimmer is a highly efficient oil skimmer which consists of 3 interchangeable skimming technologies in one skimmer. It can be used anywhere that oil is to be removed from the surface of water and has the capacity to remove approximately 98 % pure oil.

- The skimming modules are easily changed from brush to disc and to drum.
- Rugged all aluminium construction, powder coated for high visibility.
- Air Driven.
- The Tri Skimmer can be used for a wide range of oil viscosities, from light oils to heavy crudes.
- The skimmer can be supplied complete with brush, disc and drum modules or with just one required module.

Dimensions	762 x 991 x 457 mm
Weight	37 kg
Draft	230 mm
Recovery Rate	10 – 12 m ³ /hr
Air Requirements	14 cfm @ 40 psi
