

Technical Specifications

Section Length	15/25/50 m
Height	400- 1500 mm
Weight	3.0 kg/m
Ballast Weight	1.7 kg/m
Temperature Resistance	-30 - 70°C
Fabric Tensile Strength	2800 N/5cm
Boom Tear Strength	500 N

MPF Solid Flotation Oil Boom is a general purpose yellow PVC oil boom for coastal and shoreline oil spill control. It is especially suited for long-term deployment and it is widely used in ponds, lakes, rivers, harbors and near-shore petroleum platforms.

RPF oil boom is a light-weight boom made of highly durable neoprene rubber making it easy to deploy and it is designed to capture and contain floating oil and debris.

Features

- > Easy to clean and deploy.
- > High strength due to improved load distribution.
- > Top tension cable adds additional strength to the boom.
- > Long service life.
- > Custom sizes available upon request. Excellent oil-capturing ability and wave response.
