The Complete Skimmer Solution

Megator System 3 is a packaged system designed to recover and separate oil from water with a discharge quality of 10 mg/L of oil. All system components are ruggedly designed and are compatible for varying recovery and separation rates.

Megator Systems and components are used in industries where reliable, portable, and efficient equipment is required to abate or remediate oils spills or accumulations of various surface materials on water bodies. Components may also be purchased separately and used as standalone products.
