

Mobile Pump Sets provide the ideal solution for a variety of pumping applications

- **Save cost** - By transferring the pump between applications, one pump can do the work of many, not only saving the cost of buying a number of pumps, but also running and maintaining them.
- **Remote access** - Mobile pump sets can be operated in a variety of locations where access is limited.
- **For mobile pumping applications**, it is essential to have instant self-priming, strong suction and the ability to safely run under dry suction conditions - in short a MEGATOR MOBILE PUMP.

▲ L150 diesel driven set, mounted on turntable trolley
