

Technical Specifications

Section Length	25/50/100 m
Height	350 - 1200 mm
Fabric Tensile Strength	3800 N/5cm
Base Fabric	Polyester
Working Temperature	-30 - 70°C

MFF Fence Oil Boom is a general purpose red or yellow PVC oil boom for coastal and shoreline oil spill control.

MFF oil boom is especially suited for long or short- term deployment and it is widely used in ponds, lakes, rivers, harbors and near-shore petroleum platforms.

Features

- > Excellent oil capturing ability and wave response.
- > Easy to deploy, clean, and store.
- > High strength due to improved load distribution.
- > Three tension belts add additional strength to the boom.
- > Long service life.
- > Custom sizes available upon request.
- > This versatile system can be made to a customer's specific requirements.
- > Manufactured from PVC fabric with square foam floatation, three tension belts , chain ballast and ASTM quick connectors.
- > A ballast chain and belts along the top ,middle and bottom of the boom bear the longitudinal loads.
- > ASTM quick-connectors for flexible and fast deployment.
