

PureShip BilgeKleen® Polisher

- > Lloyd's Register Type Certified to discharge under 5 ppm - no sheen
- > Retrofitted as polishers post MEPC 60(33) 107(49) Bilge OWS units
- > Makes any OWS perform to IMO MEPC 107 (49) standards
- > Does not require additional pump - less than 5 psi operating pressure requirement
- > Available in standard size ranges: 0.5 m³/hr – 10 m³/h
- > Deployed in over 200 ships
- > Does not affect certification on existing 60(33) or 107(49) bilge units
- > Supplied as individual vessels or skid mounted
- > Provides performance equal to or better than most existing MEPC 107(49) Bilge OWS
- > Lower Cost than standard 107(49) Bilge Systems

Key Features of BilgeKleen® Polisher Retrofit Units

BilgeKleen Polisher Retrofit Units are available in three flow rates:

1.1 m³/hr.

2.5 m³/hr.

5.0 m³/hr.

The Operating Pressure for all flow rates is 5 PSIG, and the Operating Pressure Drop is 1-3 PSIG.
